# Redesigned 'Warfighter' Carousel Horse Unveiled at NAS Meridian

From  
Queen City Newsfeed

Naval Air Station Meridian unveiled its newly redesigned carousel horse, Warfighter, during a ceremony June 3 in front of the Pass & ID Welcome Center.

The event, organized by NAS Meridian's First Class Petty Officer's Association, marked the renewal of the base's long-standing participation in the "Around Town Carousel Abounds" project -- an initiative that raises awareness and support for Hope Village for Children. The original Warfighter horse was dedicated in 2008 and had stood at the entrance of the Navy base for 17 years before showing signs of deterioration.

The updated design was created by Mass

Communication Specialist 2nd Class Molly Tice and painted by Air Traffic Controller 1st Class Justin Gibson, the current president of the First Class Petty Officer's Association.

The unveiling featured remarks from CAPT Luke Davis, commanding officer of NAS Meridian, along with Casey Culpepper, Director of Development, and Kathy Parrish, Community Outreach Coordinator, both representing Hope Village for Children.

The Warfighter carousel horse continues to serve as a symbol of the base's connection to the Meridian community and its support of local children's services through Hope Village. The design is an ode to the colors of the T-45 Goshawk jets flown at NAS Meridian.

## AirPower Foundation Visits Library

AirPower Foundation's three Rodeo Royalty queens visited the Andrew Triplett Library today onboard NAS Meridian. They read books, sang songs, and barrel raced with stick horses! The Foundation is a non-profit organization dedicated to supporting military families, they strive to provide comprehensive assistance and resources to those who have sacrificed for our country. Through various programs and initiatives, the Foundation offers emotional support, financial aid, educational opportunities, and community engagement to help alleviate the unique challenges faced by military families.

# Fleet Readiness Center Southeast Establishes New T-45 Repair Capability

By Ashley Sherman  
FRCSE

In November 2024, Fleet Readiness Center Southeast (FRCSE) stood up repair capability for a T-45 Goshawk service life extension program (SLEP) production line supporting the Naval Undergraduate Flight Training Systems Program Office (PMA-273). FRCSE expects the first SLEP wing swap and full aircraft SLEP in June 2025, only 13 months after the Navy identified the requirement in May 2024. Usually, this process takes upward of two years. Currently, the command has one fuselage and three wings on deck, with each wing SLEP expected to take 4,000 working hours and each fuselage to take 24,000. The command expects to ramp up to work on 12 aircraft simultaneously by 2028 and the work to continue through the 2030s.

“The point of the service life extension program is to extend the flyable hours on the T-45 aircraft,” said Jeff Cavanaugh, FRCSE’s F-5 production line lead. “Right now, those hours are being reached at a faster rate than anticipated. The Goshawk is important because pilots receive their carrier qualification on this airframe, which must be completed before a pilot can fly any other carrier-capable fighter.” PMA-273 called on the command for this workload because of its proven track record establishing rapid repair capability to deliver warfighting readiness. Since the Goshawk is the primary Navy and Marine Corps tandem-seat jet trainer, the tasking came with urgency. After getting the initial call for the new work, the FRCSE team immediately began preparation, but the process presented challenges including aircraft movement,

tooling and equipment obstacles. “Fortunately, we had access to a stricken aircraft that we were permitted to use as a mock for proposed engineering repairs,” said James Bock, an FRCSE business development office structural and mechanical component lead. “However, we needed to make the aircraft mobile to transport it on public roads to our facility, which involved many logistical challenges. It was vital because having the fuselage onsite allowed us to create shoring that made concurrent work possible.” Further, FRCSE artisans use standard customary units for their tooling, but the T-45 was built using metric measurements. “Outside of moving the aircraft from Cecil Field, the first challenge was identifying the type of tooling we needed,” said Cavanaugh. “We’ve created metric kits to use while we build up our comprehensive toolboxes.”

Understanding the challenges, tight timeline and complexity of the SLEP tasking, the team realized it was necessary to divide the initial depot capability (IDC) into phases. “To provide the most positive impact back to the fleet, we came up with an incremental approach,” said Bock. “During phase one, or IDC, we trucked in three wings and performed SLEP on all three to get ahead of the process. With a backlog of wings, it’s easier to transition to IDC phase two, which allows aircraft to fly into FRCSE and swap their wings with ones that have already undergone SLEP. Finally, we have full depot capability, where we will see aircraft getting the full scope of SLEP work.” To perform the majority of the work on the T-45 wing, the command had to obtain a flip jig—a piece of equipment that allows the artisans to work on the wing’s underside. The jig turns

over, or flips, the approximately 2,000-pound wing so that artisans can conduct the repairs safely and ergonomically. After the jig was acquired, personnel underwent training and certification to effectively and safely operate it. “The majority of the work on the wing is done on the bottom, so being able to acquire the flip jig, or the device we use to flip the wing, was vital so that artisans don’t have to conduct this work over their heads or upside-down,” said Cavanaugh. “Our T-45 team’s ability to urgently answer the Navy’s call without compromising quality is a testament to their commitment and expertise,” said Capt. Mike Windom, FRCSE commanding officer. “This accomplishment highlights not only their resolve, but also FRCSE’s commitment to getting capability into the hands of warfighters faster.”

# NAVFAC Southeast Awards \$227.6M Contract for New GITMO Medical Facility

By Jeffrey Hamlin  
NAVFAC Southeast

Naval Facilities Engineering Systems Command (NAVFAC) Southeast awarded a \$227.6 million fixed-price design-build contract June 3 to DPR-RQ Construction LLC of Carlsbad, California, for a new ambulatory care center and dental clinic at Naval Station Guantanamo Bay (NSGB), Cuba. The project reflects the Navy’s commitment to enhancing the health, readiness, and quality of life for service members and their families at this strategic overseas location. “This project is more than just a new building; it’s a strategic investment in the health and resilience of military person-

Photo by Jeffrey Hamlin

**The current Naval Hospital Guantanamo Bay, built in 1954 and dedicated in 1956, has served generations of service members and their families stationed at Naval Station Guantanamo Bay. On June 3, NAVFAC Southeast awarded a \$227.6 million contract to construct a new state-of-the-art Ambulatory Care Center and Dental Clinic.**

nel and their families stationed at Naval Station Guantanamo Bay,” said Capt. Miguel Diegue, commanding officer of NAVFAC Southeast. “Reliable access to high-quality, comprehensive care is critical in a location as remote as Guantanamo Bay. This new facility will ensure our shipmates will continue to receive the care they deserve, right where they live and serve.” The facility will replace outdated infrastructure with a modern complex designed to deliver a broad range of medical services. Once operational, it will offer primary care, emergency and trauma care, behavioral health, general surgery, women’s health, orthopedics, optometry, physical therapy, dental care, laboratory and morgue

services, pharmacy, radiology, sterilization, administrative support, and logistical services. Support infrastructure includes utilities, communications upgrades, site improvements, parking, signage, antiterrorism and force protection measures, environmental protection features, an ambulance garage, medical waste incinerator, and a helipad with backup power. Demolition of the existing hospital is not included in the contract. The contract was competitively procured via SAM.gov, with one offer received. It is incrementally funded and includes eight unexercised options that could increase the total value to more than \$237 million. Work is expected to be completed by September 2029.

The academy is a 3-week course that provides certifications for military members to conduct security force operations as watch standers. ASF members are valuable to NAS Meridian’s Naval Security

# Cryoacoustics Researchers Give Critical Edge to Icy Arctic Naval Operations

By Daniel Linehan  
Naval Postgraduate School

U.S. Navy Lt. Caroline Kelly, an officer-scholar studying meteorology and oceanography (ME-TOC) at the Naval Postgraduate School (NPS), returned from the Arctic this past February where she conducted cryoacoustics research supporting her NPS thesis. With the U.S. Navy facing immediate challenges due to increasing adversary activities in the harsh, inaccessible Arctic, Kelly’s research aims to help improve naval operations in this critical environment.

Research and curriculum at NPS, such as hers, has always focused on the study of the sea to gain understanding and accurately predict the operational environments critical to effective force planning, readiness, and naval resilience. This commitment to sea power ensures that naval operations maintain the combat advantage, even out to the coldest and farthest reaches of the Arctic region.

On the expedition, Kelly joined former submariner and NPS alumnus William Jenkins of Scripps Institution of Oceanography, along with NPS Department of Oceanography faculty and retired naval officers Benjamin Reeder, research professor, and John Joseph, faculty associate for research, to work with the Navy’s Arctic Submarine Laboratory (ASL).

“Since 2018, the collaboration between ASL and NPS has led to a deeper understanding

Photo by Petty Officer 2nd Class Janiel Adames

In February 2025, Arctic researchers William Jenkins, U.S. Navy Lt. Caroline Kelly, and Benjamin Reeder (left to right) conducted cryoacoustics experiments on sea ice floating in the Arctic Ocean to improve current and future U.S. naval operations in this growingly contested environment.

of the physical properties of the Arctic Ocean,” said ASL Arctic scientist Ann Hill. “By ASL hosting NPS at the biennial Operation Ice Camp, students are afforded the opportunity to conduct independent research that provides further insight into the Arctic’s physical oceanographic environment, ultimately increasing our submarine warfighting abilities.”

During the in-between years, ASL continues to venture onto the sea ice to improve logistics, test new equipment, and prepare for the next upcoming Operation Ice Camp.

Field experiments like Kelly’s align with ASL’s Arctic Exercise 2025 (ARCEX25) to support and advance Arctic operations as this maritime domain becomes more and more contested. So, ASL provided an opportunity for the NPS researchers to get onto the

sea ice during the preparation period this year. Two small airplanes chartered by ASL launched from Prudhoe Bay, Alaska, and flew across 155 miles of the Western Arctic Ocean to reach the ideal experimental conditions identified by the U.S. National Ice Center. They landed on an ice floe where the first-year sea ice measured 5.6 feet thick.

“Due to weather delays on land, we only did one day worth of experiments on the ice, but it turned out to be excellent conditions—beautiful skies, barely any wind,” said Kelly, despite the -20 degrees Fahrenheit temperature that frosted her eyelashes with every breath. “We got everything on our checklist, collecting so much data that we’ll be able to use it for at least the next five years!”

# AVOID CONS AND SCAMS

## FOLLOW THESE FRAUD PREVENTION TIPS FROM McGRUFF:

- ❑ Beware of credit card schemes, bogus investment opportunities, and free vacation offers. If it sounds too good to be true, it probably is.
- ❑ Review carefully the written information about any offer before making any financial commitments.
- ❑ Never give anyone your social security, credit card, or bank account number or any other personal information unless you initiated the conversation.
- ❑ To learn about current scams, contact your local Better Business Bureau.

- ❑ Sign up for the Do Not Call Registry, 888-382-1222, to deter telemarketers.
- ❑ If you’ve been the victim of a scam or suspect fraud, report it to local law enforcement immediately.

To learn more ways to avoid cons and scams, visit [nccpc.org](http://nccpc.org) or contact your local law enforcement agency.

# Mississippi’s 1-204th Air Defense Artillery Regiment Holds Change of Command Ceremony

By Cash Matlock  
Queen City Newsfeed

The 1st Battalion, 204th Air Defense Artillery Regiment of the Mississippi Army National Guard held a Change of Command and Farewell Ceremony on June 2 at Huff Auditorium, marking a momentous transition of leadership and preparing for a critical deployment.

Lt. Col Marilyn M. Upton relinquished command of the 1-204th to Lt. Col. James W. White during a formal ceremony attended by Soldiers, family members, and distinguished guests, including Assistant Adjutant General Maj. Gen. John M. Rhodes and the commander of 66th Troop Command Brig. Gen. Andrew Rendon.

Lt. Col. Upton, who led the unit through key readiness milestones, reflected on her time in command with pride.

“It has been an honor to command the Soldiers of the 1-204th... to lead, train, and prepare them for their NCR-IADS mission,” said Upton. “I leave them with these words: Lead from the front, take pride in your work, be confident and be a positive influence on others. First to Fire, Last to Leave!”

Lt. Col. White, a seasoned Air Defense Officer and veteran of multiple deployments, now assumes command at a

Photo by 1st Lt. Jarvis Mace

Lt. Col. James White, incoming commander for the 1st Battalion, 204th Air Defense Artillery Regiment, passes the unit colors to Command Sgt. Maj. of the 1-204th Jon Mason, during a change of command ceremony, June 2, 2025, at the East Central Community College Huff Auditorium in Decatur, Miss. During the ceremony, Lt. Col Marilyn M. Upton relinquished command of the 1-204th to Lt. Col. James W. White.

pivotal time. The unit is preparing to mobilize in support of Operation Noble Eagle in the National Capital Region (NCR) — a mission designated by the Secretary of Defense as a “no-fail, zero-defect” operation.

“My main priority is two-fold,” said White. “First, we must ensure our Soldiers are fully trained and prepared for the NCR mission. Second, we must support our rear detachment in planning for a potential CENTCOM rotation following the deployment. We also recognize the importance of growing our formation-

by recruiting and retaining Soldiers to ensure the long-term strength of the battalion.”

The ceremony also served as a farewell for Soldiers deploying to Washington, D.C., reinforcing the battalion’s enduring motto: “First to Fire, Last to Leave.”

The 1-204th ADA has a proud lineage dating back to 1942 and has played critical roles in both homeland defense and overseas operations, including support to Operation Noble Eagle, Operation New Dawn, and recent domestic crisis response missions in Mississippi.
