How the US Bombarded Iranian Nuclear Sites While Avoiding Detection

By Farnoush Amiri &  
Meg Kinnard  
The Associated Press

It was an unprecedented attack years in the making, with some last-minute misdirection meant to give the operation a powerful element of surprise. U.S. pilots dropped 30,000-pound bombs early Sunday on two key underground uranium enrichment plants in Iran, delivering what American military leaders believe is a knockout blow to a nuclear program that Israel views as an existential threat and has been pummeling for more than a week. American sailors bolstered the surprise mission by firing dozens of cruise missiles from a submarine toward at least one other site.

Dubbed Operation Midnight Hammer, U.S. officials say the plan was characterized by a “precision strike” that “devastated the Iranian nuclear program,” even as they acknowledged an assessment was ongoing. For its part, Iran denied that any significant damage had been done, and the Islamic Republic pledged to retaliate. Taking off from the U.S. heartland, B-2 stealth bombers delivered a total of 420,000 pounds of explosives, aided by an armada of refueling tankers and fighter jets — some of which launched their own weapons. U.S. officials said Iran neither detected the inbound fusillade, nor mustered a shot at the stealthy American jets.

Photo by A1C Whitney Erhart  
A 509th Maintenance Group airman prepares a B-2 Spirit stealth bomber for takeoff from Whiteman Air Force Base, Missouri, in 2021.

The operation relied on a series of deceptive tactics and decoys to maintain secrecy, U.S. officials said hours after the attack, which was preceded by nine days of Israeli attacks that debilitated Iran’s military leader-

ship and air defenses. Even before the planes took off, elements of misdirection were already in play. After setting parts of the plan in motion, Trump publicly announced Thursday that he’d make a decision within two weeks

on whether to strike Iran — ostensibly to allow additional time for negotiations, but in actuality masking the impending attack. One group of B-2 stealth bombers traveled west from Missouri on Saturday as decoys, drawing the attention of amateur plane spotters, government officials and some media as they headed toward a U.S. air base in the Pacific. At the same time, seven other B-2s carrying two “bunker buster” bombs apiece flew eastward, keeping communications to a minimum so as not to draw any attention. Air Force Gen. Dan Caine, the chairman of the Joint Chiefs of Staff, said at Sunday’s briefing ●Operation Midnight Hammer, page 2

Governor Signs Bill 2434 Authorizing IGSAs

Mississippi Governor Tate Reeves ceremonially signs Senate Bill 2434 which authorizes counties and municipalities to enter into Intergovernmental Support Agreements (IGSAs) with military branches during a event at the 186th Air Refueling Wing of the Mississippi National Guard at Key Field in Meridian. Looking on are Major General Bobby Ginn Jr., adjutant general of the Mississippi National Guard; CAPT Luke Davis, commanding officer of Naval Air Station Meridian; Col. Cindy Smith, commander of the 186th ARW, and members of the Mississippi senate and House of Representatives. IGSAs will help improve our military installations offering various support services, which could potentially include maintenance, infrastructure, logistics, or other administrative functions. “IGSAs strengthen the bonds between installations and communities,” said Gov. Reeves. “For installations, they provide efficiency and operational effectiveness. For communities, they provide economic benefits.”

# Mississippi National Guard Deploys to Washington, D.C. for Army’s 250th Birthday

By Cash Matlock  
Queen City Newsfeed

Approximately 280 members of the Mississippi National Guard have deployed to Washington, D.C., to assist with security during the U.S. Army’s 250th birthday celebration on June 14, 2025. Soldiers and Airmen from the 112th Military Police Battalion, the 172nd Airlift Wing, and the 186th Air Refueling Wing departed Thompson Field Air National Guard Base in Flowood on Thursday morning. They will support the U.S. Secret Service and U.S. Park Police in maintaining public safety in the National Capitol Region. The Guard’s mission is to enhance the capacity of federal and local agencies in ensuring the protection of life and property throughout the celebration. Events commemorating the Army’s 250th anniversary include a Wreath Laying Ceremo-

**Members of Task Force Liberty begin boarding their plane ahead of their mission in the National Capital Region, June 12, 2025, at Thompson Field Air National Guard Base. The task force, which includes Soldiers from the 112th MP Battalion and Airmen from the 172nd Airlift Wing and 186th Air Refueling Wing of the Mississippi Air National Guard, will support the U.S. Secret Service and U.S. Park Police during the Army’s 250th birthday festivities.**

ny at Arlington National Cemetery, a Birthday Festival on the National Mall, an Army Band concert, and a parade, among other ceremonies. Founded on June 14, 1775, the U.S. Army is the oldest branch of the U.S. military. This milestone reflects its continued legacy of service from the Revolutionary War through to modern-day operations at home and abroad. The Mississippi National Guard expressed appreciation for the continued support of its service members and their families.

**●Operation Midnight Hammer**

told reporters Sunday. About an hour before the B-2s entered Iran, Caine said that a U.S. submarine in the region launched more than two dozen Tomahawk cruise missiles against key targets, including a site in Isfahan where uranium is prepared for enrichment. As the U.S. bombers approached their targets, they watched out for Iranian fighter jets and surface-to-air missiles, but encountered none. At 6:40 p.m. in Washington and 2:10 a.m. in Tehran, the first B-2 bomber dropped its pair of GBU-57 massive ordnance penetrators on the deeply buried Fordo uranium enrichment plant. It was the first time these so-called “bunker busters” had ever been used in combat. Each 30,000-pound bomb is designed to burrow into the ground before detonating a massive warhead. The Fordo site received the bulk of the bombardment, though a couple of the enormous bombs were also dropped on a uranium enrichment site at Natanz. The U.S. bombs fell for about half an hour, with cruise missiles fired from submarines being the last American weapons to hit their targets, which in-

cluded a third nuclear site at Isfahan, Caine said. Both Iran and the U.N. nuclear watchdog said there were no immediate signs of radioactive contamination around the sites. The mission included: 75 precision-guided weapons: these included 14 GBU-57 “bunker buster” bombs deployed by the seven B-2 Spirit stealth bombers, and more than two-dozen Tomahawk cruise missiles launched from a U.S. submarine. 125 aircraft, including the B-2 bombers, fighter jets and refueling planes. Hegseth said Sunday that “our boys in those bombers are on their way home right now,” but a U.S. official said one woman was among those piloting the B-2 bombers. The official spoke on the condition of anonymity because they were not authorized to speak about the mission publicly. Caine said the use of the bunker-buster bombs made the mission historic, as did other elements. “This was the largest B-2 operational strike in U.S. history, and the second longest B-2 mission ever flown, exceeded only by those in the days following 9/11,” he told reporters Sunday.

# Getting War-Fighters Ready for the Fleet!

Courtesy Photo

**1stLt Tyler Anderson of Training Squadron Seven and Chief Tinamarie Anthony, an NATTC A School Instructor, shared the responsibility of training America’s finest future war fighters, that are now ready to support the Fleet! A T-45C Aircraft Display, Maintenance Control and Paraloft briefing were presented to 23 of America finest “Fighting Professionals.” Under Chief Anthony leadership, she shared the internal workings of the AZ rating world! The AZ rating in the United States Navy is an Aviation Maintenance Administrationman. AZs perform a variety of administrative, clerical, and managerial duties to support aircraft maintenance activities. They work with data, maintain records, and manage systems to ensure aircraft maintenance is efficient and compliant.**

# 2024 Annual Consumer Confidence Report

<div>2024 ANNUAL CONSUMER CONFIDENCE REPORT (CCR) ANNUAL WATER QUALITY  NAVAL AIR STATION, MERIDIAN NAVFAC SE, DETACHMENT, PUBLIC WORKS DEPARTMENT Water Treatment Facility (MSDH PWSID # 0380026) 229 Allen Road Meridian, MS 39309 (Lauderdale County)  June 12, 2025</div>
<p>We are pleased to present our <b>2024 Annual Consumer Confidence Report for Water Quality</b> as required by the Safe Drinking Water Act (SDWA) for the consumers of <b>Naval Air Station (NAS) Meridian</b>. We are proud to announce there are no violations to report and all reports and all sample test results are within required specifications. This report is a snapshot of our water quality and provides you with details about where it comes from and what it may contain. We are committed to ensuring the quality of your water is within the safe drinking water limits, as set forth by the Mississippi State Department of Health (MSDH) and the Environmental Protection Agency (EPA). We are continually striving to improve the water treatment process and to protect our water resources. The MSDH and the Certified Operators of NAS Meridian periodically monitor more than 90 different organic and inorganic contaminants routinely and periodically, according to Federal and State statutes, rules, and regulations.</p> <p>We want to keep you informed and updated about the water quality and services we provide. For your review, the 2024 Water Quality Data Table below contains the results of our sample testing for contaminants between January 1 to December 31, 2024, unless otherwise noted. The EPA and MSDH have set schedules for some test samples, others are routine daily or monthly testing. All results are reported using the most recent test samples taken in accordance with MSDH and EPA testing protocols and schedule requirements. For a brief explanation of acronyms and terms used throughout this report, see the Reference Tables on pages 7 and 8.</p> <p>In order to ensure the tap water is safe to drink, the EPA prescribes regulations for allowable limits for contamination in water provided by public water systems, as all sources of drinking water, both tap water and bottled water, including all bodies of water and man-made wells contain traces of naturally occurring or man-made containments. As water travels, it dissolves naturally occurring minerals and may pick up substances or containments such as microbes, inorganic and organic compounds, and very rarely, radioactive substances. Most contaminants are detected at extremely low levels and typically are not considered to be harmful, such as fluoride, sodium, and potassium, which add nutritional value and improves the taste.</p> <p>Our water is sourced by the Lower Wilcox Aquifer and treated in a “treatment train” (a series of processes applied in a sequence) that includes coagulation, flocculation., sedimentation, filtration and disinfection. Coagulation removes dirt and other particles suspended in the source water by adding chemicals coagulants to form tiny sticky particles called “floc,” which attract the dirt particles. Flocculation (the formation of larger flocs from smaller flocs is achieved using gentle, constant mixing. The heavy particles settle naturally out of the water in a sedimentation basin. The clear water then moves to the filtration process where the water passes through sand, gravel, charcoal or other filters that remove even smaller particles. Your water is treated by disinfection. Disinfection involves the addition of chlorine or other disinfectant to kill dangerous bacteria and microorganisms that may be in the water.</p> <p>1</p>

## Bring your Daughter to Work Day – Aircraft Carrier Edition

By Senior Chief Petty Officer Andrew McCord  
USS Nimitz

In the Navy, many toss around the word “family” casually. Divisions become families. Departments become families. Berthing members become families. Co-workers who spend 18 hours a day working together and another six sleeping near each other become family members.

And just like blood and legal family members, Sailors rarely get to choose who their Navy family members are, and often they mirror the same players in a regular family: the serious mother, the doting father, the goofy uncle and the devil-may-care cousin. Along the way, the Navy put various policies in place to ensure family members don’t serve together, and the reasons are sound: avoidance of favoritism, unnecessary or unintentional perceptions, and of course the worst-case scenario: potential end of a bloodline. And as Sailors will do, they keep their heads down and simply accept these policies as law and move along with their lives.

Photo by MCSA Frankie Guage

From left, Aviation Machinist’s Mate Senior Chief Dan Reyes and his daughter, U.S. Midshipmen 2nd Class Gabriella Reyes, from Miami, Florida, watch a vertical replenishment on the fantail aboard the aircraft carrier USS Nimitz (CVN 68) in the South China Sea, June 10.

Thus, when family members do – somehow – manage to find their way to serving at the same command, it’s cause for people to take note, tilt their heads in curiosity and simply try to understand the how and the why. Enter Senior Chief Aviation Machinist’s Mate Dan Reyes, the power plants and airframes work center leading chief petty officer for Helicopter Sea Combat Squadron (HSC) 6, currently deployed aboard the aircraft carrier USS Nimitz (CVN 68). By sheer coincidence, Reyes

found himself serving for eight days alongside his daughter, Reserve Officer Training Corps (ROTC) Midshipman 2nd Class Gabriella Reyes, a junior majoring in statistics at Florida State University. Despite 20 years of active duty service, Senior Chief Reyes found himself surprised and definitely pleased when he learned his daughter would be embarking Nimitz for her summer training cruise. “It’s been a dream come true,” he said. “In my years of service, I would never have imagined I would be de-

## Retired Marine F-35 Pilot Finds New Way to Serve at FRCE

By Heather Wilburn  
Fleet Readiness Center East

After soaring through two decades as a Marine Corps fighter pilot, Ross Fearon wasn’t quite ready to hang up his flight suit. Instead, he embarked on a new mission after retiring from the Corps, trading combat maneuvers for flight testing on the cutting-edge F-35 Lightning II aircraft service at Fleet Readiness Center East (FRCE). In his new role as an F-35 maintenance test pilot, Fearon ensures the nation’s warfighters receive flight-ready aircraft following modification or repair at the depot. Now, as a civilian flying the nation’s newest military fighter jet, Fearon is member of a group that includes just a handful of individuals. As a civilian F-35 test pilot at a military aircraft maintenance facility, he’s the sole member of a very exclusive club of one. “It definitely still surprises me sometimes when I think, ‘Wow, I’m going to jump into a \$100 million airplane today and make sure everything works properly,’” Fearon said. “And, if all goes well, I’ll jump in it again tomorrow and take it across the country to deliver it to its home station. It’s a little wild that I’m still able to do this as a civilian, and I’m fortunate to

Photo by Samantha Morse

**FRCE F-35 maintenance test pilot Ross Fearon taxis during a functional check flight on an F-35B Lightning II to ensure the aircraft’s airframe, engines, accessories, and equipment are functioning according to standard following service at the depot. Fearon took on the role to test pilot at FRCE following 20 years of service as a fighter pilot in the Marine Corps in order to continue serving the nation by helping deliver flight-ready aircraft to the warfighter.**

have this opportunity.” According to FRCE F-35 Branch Head Ike Rettenmair, employing a full-time civilian pilot was an innovative concept that has resulted in reduced modification turnaround times by removing the potential for pilot scheduling conflicts. Fearon is readily available to conduct aircraft pickups and deliveries (also known as ferries) and functional check flights, which determine whether an aircraft’s airframe, engines, accessories, and equipment are functioning according to standard. “Having Ross in the

office right next door to me has been a huge benefit to us from a planning perspective,” Rettenmair said “Knowing that we can, without question, put a pilot in the seat when an aircraft is ready for a functional check flight – that’s a huge gain for us. Prior to having him on board, we’d have to go out to the units and ask them to provide a pilot whenever we’d have a functional check flight or a ferry and, of course, the units have their own priorities. With Ross here, we don’t have any delays.” Fearon’s ability to pilot all three variants

## T-45 Goshawk Honors Naval Aviation Legend

Photo by Jonathan Tweedy

The newly painted T-45 Goshawk “show bird” from Training Squadron (VT) 86 and Training Air Wing (TW) 6 based at NAS Pensacola! The homage honors Naval Aviation legend William “Willy” Driscoll, the only Naval Flight Officer Ace, who scored 5 air-to-air victories as a LTJG in the skies over North Vietnam in 1972. The new scheme pays tribute to VF-96’s iconic F-4 Phantom paint, with a special nod to Driscoll’s aircraft, Showtime 112, now displayed in the San Diego Air & Space Museum. Willy’s name is proudly displayed on the rear cockpit alongside five kill marks, at his own request, reminding today’s student Naval Flight Officers that history is made by those wearing the same wings and rank they do now. Recently, the commemorative T-45 traveled to NAS Meridian, where Driscoll saw it in person for the first time.

## Financial Literacy Takes Root at NAS Meridian's SAC Program

NAS Meridian's School-Age Care (SAC) Program recently hosted a session on financial literacy, led by Personal Financial Manager Marie Brinston and Work and Family Life Lead Brittney Butchee. The summer program -- geared toward military and civilian dependent youth -- offered a hands-on introduction to money management. Students began by identifying different U.S. currency bills, then participated in a powerful visual exercise comparing what happens to \$100 kept in a piggy bank, tucked into a wallet, or deposited into a bank account earning 4.92% APR. For more financial information, contact Marie Brinston at (601) 679-2360.
