NAVAL AIR STATION CORPUS CHRISTI ENVIRONMENTAL POLICY

Mission Alignment: At NAS Corpus Christi, we recognize that Environmental Excellence is a principal factor in successful mission accomplishment. To remain the Forge of Naval Aviation, we must be **Disciplined** stewards of the land, air, and water that make our training mission possible. This is in alignment with our core mission in providing the best possible service and facilities to our customers with pride.

In support of this mission NAS Corpus Christi will continue to exemplify the highest **Commitment to Stewardship**. In that, **WE** are committed to protecting, preserving, and conserving our environment through:

Active Stewardship: We will protect our natural resources to ensure the Western Cradle of Naval Aviation remains a viable training range for generations to come.

Pollution Prevention (P2): We will be **Deliberate** in our procurement of green products and our efforts to reduce hazardous waste.

Compliance: We will be **Dependable** partners by meeting or exceeding all federal, state, and local environmental laws.

Community: We will increase our community awareness of environmental programs and conservation through engagement, media, and education.

Everyone's Individual Responsibility: Every member of the NASCC team – Sailor, Civilian, and Contractor – is responsible for preventing environmental impacts. If you identify an environmental risk, **Step up, Step in**, be **Decisive** and report it to the **Environmental Director at (361) 961-5353**.

P. W. NICKELL
Captain, U.S. Navy
Commanding Officer
